

# PHASED RETURN TO ACTIVITY GUIDANCE FOR SNOWSPORT INSTRUCTORS / COACHES

26th May 2020

This guidance might be  
updated in due course

**SNOWSPORT**  
**ENGLAND**

## Introduction

*This guidance document has been developed in adherence to the initial “steps” outlined by the government on 10th May 2020. All Snowsport England guidance will be updated as per government guidelines when they are made available or as soon as possible thereafter.*

The safety and wellbeing of all snowsport users, coaches and the wider community is at the heart of any guidance that Snowsport England is distributing. We know that snowsport enthusiasts, athletes, coaches and Snowsport venues will be keen to resume activity as soon as it is safe and appropriate for them to do so. Snowsport England recognises that wish BUT at the same time wants to ensure that the safety and wellbeing of everyone in the snowsport community, facility providers and the wider community is considered as the first priority.

These guidelines apply to England only and are based on those detailed in the use of public spaces, outdoor activity and exercise government document. More details are available [here](#). We recommend that you stay up-to-date with government guidance at all times. Government guidance supersedes all advice given by the governing body and must be followed at all times.

The guidance that follows provides sport specific advice to help engage snowsport users. **It is important to say that any return to activity must take account of local conditions and any risk assessment for normal activities should be undertaken as well as ensuring that all government guidance around Covid-19 is taken into account.** It is the responsibility of each snowsport user, athlete, coach and facility to make that assessment based on their local environment. Risk assessment must take into account mitigations and plans for when activities do not go as expected. Planning scenarios around, for example, an injury occurring to an athlete and the need to support that athlete while social distancing should be undertaken.

Snowsport England is advising that group activity does not take place during this first step due to the requirements for social distancing.

**Your health: it is of paramount importance that instructors / coaches monitor themselves for any signs of the virus, as well as general health. All coaches should follow the advice of their GP or medical practitioner in all cases.**

This guidance has been published on the understanding that it is an interpretation of government guidance relevant to all snowsport activity. It is likely to change at short notice, in which case we will publish updates through the [Snowsport England](#) and social media channels.

All parties should note the [disclaimer](#) at the end of this piece. Please also read our other guidance documents:

- Guidance for Athletes – return to activity
- Guidance for Coaches – return to activity

## Section 1: Before and after instructing / coaching

### Stay up-to-date

- Check all guidance that has been published, especially concerning social distancing and hygiene and any athletic specific guidance.
- Be aware guidance can change quickly and more restrictive rules may be applied in the future, so please refer to the [Snowsport England](#) website regularly.
- At this point in time **Snowsport coaching activity can take place on a one-to-one basis only (i.e. one coach and one athlete/ participant OR two athletes / participants with no coach present). These two individuals do not need to be from the same family household, but both must adhere to the latest social distancing guidance.**
- Check directly with your Club on their policy, outdoor slope facilities should only open at the discretion and with the consent of the facility owner, provider or contractor.
- A coach can carry out a coaching session with one athlete and then coach a further athlete **after** the conclusion of the first session.
- It is recommended that a time buffer is built in between sessions to enable social distancing and adequate cleaning, according to guidelines, to take place.
- Coaches should not coach more than one athlete at any one time, even if one or more of those athletes is not present all the time.

### Before leaving home

- Follow all hygiene guidance including washing your hands.
- Ensure that all arrangements have been made prior to leaving home so that any government advice on social distancing, as an example, can be maintained at any facility. This may mean prior coordination of activities with your coach or the facility management.
- At this point in time only outdoor facilities may be used – see our Guidance for Snowsport Venues document for further guidance.
- Athletes should ensure they are prepared and have planned for circumstances where injuries or other accidents occur, and they have mitigating procedures and plans in place to resolve the issue while maintaining all government guidance.
- Ensure you have enough food and hydration for the session.
- Be aware that changing facilities and toilets may not be open.
- Athletes should ensure that any risk has been assessed in carrying out their activity.

### Equipment/Facility

- Take hand sanitizer with you.
- Read all the facility guidance in our Guidance for Snowsport Venues document.
- Ensure that all equipment is cleaned before and after use.
- Government advice on cleaning is [here](#).

### Training and coaching

- Do not congregate before or after training, return home.
- Ensure specific event guidelines are followed – read **Section 2** of this document.

## Section 2: Participant Guidance

### Younger participants (under 18 years of age)

- Coaches must ensure they have the permission/agreement of the responsible parent or guardian of a participant who is under the age of 18 to coach that athlete.
- Coaching of young participants should only be undertaken **in sight of** the parent or guardian due to the one-to-one nature of coaching restrictions at the current time.
- Social distancing guidance must be maintained at all times.

### Older Participants

- All guidance applicable to coaches and athletes in this document is relevant to older participants.
- In addition, government guidance on vulnerable persons should be adhered to, if relevant, and taken into account by coaches and individual participants.

### Disabled Participants

- Higher Risk: Participants in the higher risk groups should follow any medical guidance they have been given about ensuring good health and welfare. If there are further concerns, please consult with your medical or national organisations for support and best practice.
- General Assistance: disabled participants requiring support are permitted to bring one carer with them to training provided this person is part of their normal 'family' unit. This could include participants with an intellectual impairment, participants needing support fastening boots, changing, stretching etc. Coaches should maintain social distancing guidance.
- VI Guides: currently, with the social distancing rule of 2m being in place, unless the guide is a family member or part of a family unit then snowsport guiding should not be carried out.
- Equipment: para participants will be permitted to use their personal snowsport equipment. Hygiene guidance should be followed at all times.
- Accessible Toilets: see our Guidance for Snowsport Venues document, be aware that these may not be open.

### Communication and facility liaison

- Coaches and athletes/participants should ensure when they are planning to use a facility that they coordinate all activities prior to coaching to ensure social distancing, as well as health and safety and cleaning protocols, can be carried out.
- This communication should take place between all coaches or coaching coordinators and facility providers.
- Coaches and athletes/participants can access and utilise outdoor athletics training facilities with the permission of the facility owner/management. They should not access any facilities if they do not have permission to use and should at all times adhere to any guidance put in place.
- Coaches and athletes should be aware of any restrictions around toilets and specific access issues for athletes with a disability or vulnerable athletes. In all cases they should ensure government guidance is followed and a risk assessment in place before any coaching takes place.

## Pre-Session guidance

- In all cases normal coaching practice with risk assessment and high-quality practice should be adhered to as well as implementing any requirements around social distancing and hygiene.
- All coaches and athletes should ensure they have followed government hygiene rules including washing hands and cleaning any equipment prior to use. (See our **Guidance for Snowsport Venues document**).
- All coaches and athletes/participants must follow any hygiene guidance put in place by a facility.

## During the Session

- Coaches and athletes should ensure they maintain social distancing appropriate for the activity.
- ONE mat gap is not socially distanced.
- Coaches and athletes/participants should ensure all equipment is used by one athlete/participant and then thoroughly cleaned according to guidance before and after each session.
- Coaches should ensure they maintain social distancing at all times as well as maintain social distancing from any other coaches and athletes using adjacent space.
- Coaches are encouraged to be creative around event specific drills and other activities to bring athletes out of 'lockdown' in preparation for when this equipment can be used in a later 'step'.

## Roller Ski Sessions in a public space

- Coaches and athletes/participants training in a public space, other than a facility, can take place on a one-to-one basis only (i.e. one coach and one athlete OR two athletes with no coach present). These two individuals do not need to be from the same family household, but both must adhere to the latest social distancing guidance.
- Coaches and athletes/participants should adhere to all restrictions that may be placed on a public space by the owner of that space.
- A coach can carry out a coaching session with one athlete/participant and then coach another athlete/participant after the conclusion of the first session. Coaches should not coach more than one athlete/participant at any one time.
- Coaches should ensure they have carried out a standard risk assessment of any training space or route, as they would normally, prior to the session taking place.
- Coaches and athletes/participants should ensure they carry out standard safety procedures (e.g. phones, route planning etc) when accessing 'wild' public spaces.
- Coaches and athletes aiming to access remote public spaces a long way from assistance and emergency services should make themselves aware of any local guidance/considerations prior to travel/training. Consideration of whether the activity could add to pressure on emergency services should be taken.

### **Section 3: Disclaimer**

*Please note that the subject matter covered in this guidance is in no way exhaustive and the material does not stand on its own nor is intended to be relied upon as a substitute for obtaining specific legal advice. Individual circumstances will differ. The information contained in this guidance is given in good faith but any liability of Snowsport England or its professional advisors (including their respective members or employees) to you or any third party which may arise out of the reliance by you or any other party of the contents of this guidance is hereby excluded to the fullest extent permitted by law. Snowsport England and its professional advisors accept no duty of care or liability for any loss occasioned, whether caused by negligence or otherwise, to any person acting or refraining from actions as a result of any material in this guidance. We would strongly recommend that you consult professional advisors on specific issues before acting or refraining from action on any of the contents of this guidance.*
