

UPDATED SNOWSPORT GUIDANCE 02/12/2020

Whilst we had hoped that we would have been able to publish new full guidance documents for snowsport ahead of lockdown being lifted, we had to await the publication of the Government's full, detailed guidance - this was finally published last night, with new '[grassroots sports guidance for the public and sport providers](#)' replacing the previous guidance on the phased return of grassroots sport.

Based on this and Sport England's new FAQs which have been recently published we are now in the process of producing new full guidance documents for snowsport facilities, clubs, coaches and participants - the Tier Table provides an overview of snowsport activity by tier, but the full guidance documents will detail all procedures and information needed for snowsport activity to take place safely and in line with Government guidelines, covering more general things applicable not just to snowsport. We appreciated these are needed and so will be made available as soon as possible.
